

MERITUS SCHOOL OF OSTEOPATHIC MEDICINE

Educational Continuum Policy

Policy Number:

Effective Date:

Approved by: _____

Policy & Procedure Statement

The Meritus School of Osteopathic Medicine (MSOM) is committed to supporting the continuum of osteopathic education – including predoctoral education, graduate medical education, and continuing medical education.

Meritus Medical Center (MMC) serves as an ACGME Sponsoring Institution with an accredited family medicine residency, which plans to also receive osteopathic recognition. MSOM and MMC intend to continue the development, growth, and maintenance of graduate medical education (GME). The MSOM GME Department will, through the DIO, continue to provide clinical and didactic education for medical students and resident physicians, support for research, and education in OMM/OPP.

Additionally, MSOM will support Continuing Education for the school, graduates, and the professional community. The Continuing Education department serves to improve professional knowledge and skills; fosters a positive impact on patient outcomes; exposes clinicians to new information; and develops an interdisciplinary, healthcare team approach to treating patients and improving community/population health through the development and implementation of cost-effective, evidence-based education programs.
